Welcome to Showtime

This is our eighth show. If you've never seen it before, we sure hope you enjoy it and that you'll come back again next year. If you're a seasoned member of the audience you'll notice that we've made some alterations in the format of the show. We hope you like them.

The production team spends a lot of time working out new ideas to include in the show. This year particularly we have made many changes. Our aim is to produce something fresh and vital each year to match the enthusiasm of the cast. As you watch the show we hope you'll think that in some small measure we've succeeded.

Lights, Camera, Action

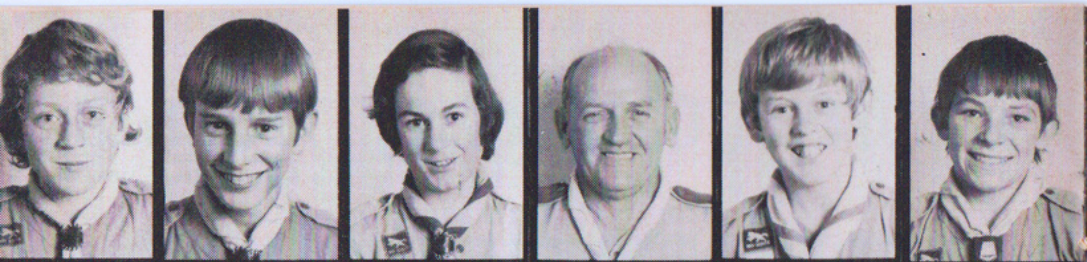

The scene is a small clearing at Clifford Park on the banks of the Yarra; the time is a cold and rainy Sunday morning June. Various members of the Showtime team are huddled under raincoats. Eight of the younger members of the cast are standing under a small canvas fly with bright summery smiles, throwing off clothes and preparing to go swimming!

Thus did we film a small section to edit into our film 'The Survivors' which you will see in the Show tonight. In fact you are attending the World Premiere. Our filming activities this year have taken us all over Victoria, from Yarrawonga to Phillip Island and, although this is not our first filming venture, it is the first time we have produced a film with a sound-track.

The bulk of the work in making the films you will see tonight was done by members of the Showtime team. Work on 'Edna's discovery tour of Phillip Island' was begun during the 1971 Showtime reunion. 'The Survivors' will go on to be used by the scout movement as a training and ideas film.

This space donated by Prentice Builders Pty. Ltd.

Companion

PORTABLE GAS EQUIPMENT

Round-a-bout

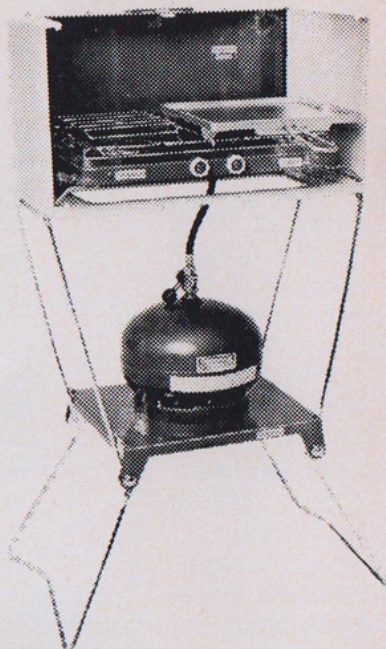

Portable
Gas Barbecue (No. 280)
Big party. Big appetites. The all-new Round-a-bout can handle them. And when they come back for seconds, there's no waiting.

Round-a-bout's huge circular barbecue plate cooks up a ton of food. Unique convex design allows for perfect fat free cooking. Fat runs into the deepest, easiest to clean fat well of any barbecue. Just unclip to clean. High output burner can be regulated at the cylinder so that food is cooked the way you like it. For added convenience, a polished stainless steel wind-shield is fitted.

Safari

Twin Burner Portable
Gas Stove (No. 1700)

Roughing it, the easy way. The blue sky, the fresh air and breakfast sizzling away on the Safari. With Safari, any meal is a treat. Two big gas burners with separate controls means your coffee's ready the same time as the sausages and eggs. Fold-down toaster, meal size barbecue plate, full height windshields and easy-clean stainless steel splash tray makes Safari a great companion. Attach a lantern and cook at any time. If you want a table-top model, for cooking indoors, simply unclip Safari from its case and you have a handy compact unit. Safari folds to brief-case size and takes up so little room.

Lantern

Outdoor Lantern (No. 245) 100 watt capacity. Mantle slips on, no tying is necessary. Insect and storm proof. Ideal for camping, outdoor parties, barbecues, in fact anywhere you need light.

How to get your Photographer Badge.

Here's the right camera to help you
win your Photographer Proficiency
Badge.

With a 'go-anywhere' Kodak Instamatic 'X' camera and Kodak black-and-white film, you can take all the pictures called for in the rules. And later, you can have lots of color photography fun too!

Ask your Kodak dealer. He'll tell you about Kodak developing and printing materials too.
